The Emblematic Mediterranean Mountains Network

The **Emblematic Mediterranean Mountains Network** is a constellation of Med territories. Over the years, it has become a community to work on common challenges by tackling them through thematic projects.

In 2013 representatives of Mediterranean mountains came together to explore the best ways of sharing, exploring, and preserving their exceptional patrimonial values in a sustainable and open approach. Being 5 initial members, the Network has grown across successive projects.

Shared identity

Members use the term “EMBLEMATIC” to qualify the quality of experience associated to their territories and they characterized it with 10 commonly shared criteria:

1. Proud local people
2. Institutional recognition
3. Reputation
4. Legends and myths
5. Power of inspiration
6. Picturesque landscape
7. Particular ecosystem
8. Mediterranean cultural identity
9. Sustainable and anthropogenic environment
10. Historic places

Common values

- To apply a global sustainable approach.
- To preserve cultural and natural heritage and the experience associated to it.
- To be an open mountain, gathering value through people, both visitors and local.
- To cooperate to transnational and interterritorial projects.

EMBLEMATIC
MEDITERRANEAN
MOUNTAINS

Emblematic Mediterranean Mountains project (Leader, 2013-2015)

In 2013 we started with the creation of an international network of EMM (network of Emblematic Mediterranean Mountains). Created in October 2013 by actors from around Europe, meeting in Canigó (France) to share their ambitious network. This Network was launched under the initiative of three rural areas from France, Greece and Bulgaria working within the framework of local Leader programs (funded by European Agricultural Fund of Rural Development). This creation was motivated by the will to address specific common challenges:

- To preserve patrimonial values from endogenous and exogenous threats.
- To share positive experiences and good practices.
- To increase international recognition.

Partners decided to use the term EMbleMatiC to characterize the experience associated to the unique and exceptional nature of their mountains territories and to create a common charter summarizing their common values and their 6 common emblematic criteria.

EMbleMatiC Project (2016-2019)

The Project brought together 9 mountains territories from 6 countries to test and create a more responsible and sustainable tourism development model located in their hinterland coastal areas with strong rural and island characteristics. With the help of an academic partner, they co- defined a list of 30 sustainable attributes for the creation of an eco- itinerary. Since the resulting 9 eco- itineraries routes are complying with these attributes they successfully contribute to:

- Extend the seasonality.

EMBLEMATIC
MEDITERRANEAN
MOUNTAINS

- Rebalance geographically visitors flows.
- Reduce environmental impact whilst generating economical return to low-density areas.

A collection of 9 videos, tourism guide and maps were produced to ensure a common promotion of eco- journey packages. A transfer guide in 6 languages was produced to summarize the process followed.

EMbleMatiC PLUS project (Interreg, 2021-2022)

EMbleMatiC PLUS is the follow-up transferring project to maximize the impact of what accomplished and worked to

new territories. It involves 3 givers' partners from the previous EMbleMatiC project, 4 new receivers' partners and 7 associated partners.

The transferring strategy applied unfolded in three phases to work together on adapting the steps described within the initial “transfer guide” into a “transfer process” applied by each receiver and adjusted according to its own context or transferability potential.

PHASE 1: Receivers made their own experience by visiting givers the eco- itineraries before working for three months with a coaching team on developing their own eco- itinerary proposal whilst complying with the set of 30 attributes from the previously applied TOR for the creation of the eco- itineraries.

PHASE 2: Receivers welcomed an assessing team (3 givers & 1 assessor) for an on-site assessment visit: it consisted of two -days on site cross analysis & peer review on the base of a Programme of visits representative of the future eco-itinerary proposal. It resulted on the publication for each receiver of a “Receiver’s transferability diagnostic relying on transfer guide”.

PHASE 3: Receivers used the insights and personalized recommendations from the diagnosis, to elaborate and write an individualized “local implementation action plan for the future creation of their eco- itinerary” beyond the duration of this current project.

EMBLEMATIC
MEDITERRANEAN
MOUNTAINS

LEADER

This should ultimately provide each receiver with a roadmap to create a new and alternative tourism product offer for its offer.

Youth for Emblematic Mediterranean Mountains- Y4EMM (Erasmus+, 2020-2022)

An effective green transition requires the involvement of a diversity of stakeholders: local public authorities, NGOs, citizens...but we shouldn't forget the young generation. Raising awareness on climate change and the environment (both natural and cultural heritage) among young people is essential to build the world of tomorrow. Young people are tomorrow's key-players! Meanwhile, they spent most of their week time in class, studying, learning, and discovering, with the help of their teachers. Thus, the class could be the perfect learning environment to raise awareness on natural and cultural environment and climate change challenges. These topics do not have to be studied as a new academic discipline but could and should be addressed through classic topics: history, geography, biology, sciences, mathematics...

Moreover, learning through concrete and local examples is often the best way to reach young people. The aim was to start from our respective local framework (young people living areas) before building bridges between our European territories facing common challenges: how to protect and highlight our natural and cultural heritage, how to encourage young people to remain in their areas, how to raise awareness on environmental issues, how to mobilize citizens and notably the young generation on the climate change issues, how to encourage them to be proactive nowadays and in the future, by choosing green careers.

These are the challenges risen by Y4EMM Erasmus+ project. Our main objectives for this project were the following:

1. To raise awareness of young people to make them aware of the natural and cultural diversity of their environment.

EMBLEMATIC
MEDITERRANEAN
MOUNTAINS

2. To help young people to become drivers of change to better protect their environment and territory nowadays and in the future.
3. To enable them to be “ambassadors” of their territory to represent it both locally and at the European scale, being able to present their area, its environment, history, biodiversity.

Emblematic Mediterranean Mountains 2 (CLLD/Leader, 2022-2023)

The specific transnational cooperation project is a continuation of the cooperation project entitled "NETWORK OF EMBLEMATIC MEDITERRANEAN MOUNTAINS" which was successfully implemented in the framework of the Leader local program of Pieria in 2007-2013. Then, through the Interreg MED program and the EMbleMatiC project, the corporate consortium was expanded, and the involved territories were offered the opportunity to design and promote alternative tourism products (eco-journeys), based on common values and sustainable development criteria.

In addition to the above mentioned, the partnership gave rise to other common challenges such as the need to protect the environment, the regional development and the economic/social cohesion and the need to support the new generation. In fact, these sectors require the implementation of special policies, vital for the future of mountainous regions, as:

- These mountainous regions with a predominantly rural character face strong environmental problems, but also issues of marginalization/desertification. How will we manage to maintain the quality of life of the local population while promoting a sustainable development based on a new type of activities?
- These mountainous areas are in the interior of the Mediterranean basin and face problems from climate change, the reduction of the young population and the exceeding of the carrying capacity of their nearby coasts. How will we reverse the effects of climate change by adapting development policies and benefiting at the same time from the attractiveness of nearby coastal areas?

The purpose and structure of the Handbook

The Sustainable Tourism Handbook includes good practices implemented in emblematic mountainous coastal areas in partners' regions. Those responsible for the implementation of the practices come from public and private bodies and organizations, enterprises, and authorities (public and private).

The Handbook is divided in three main chapters; the 1st one concerns practices related to visitors, the 2nd concerns practices related to public and private local authorities and the last one concerns practices related to enterprises. The total number of the practices are 24 plus 1. In addition, the practices are divided based on their content into practices related to alternative activities, mobility, circular economy, the promotion of local products and/ or services as well as networking activities as seen below.

Categories of practices	Total number
Practices related to alternative activities	11
Practices related to mobility	3
Practices related to the promotion of local products and/ or services	4
Practices related to networking activities	5
Practices related to circular economy	4

The proposed practices are described in detail and provide - among other useful information - innovations incorporated, challenges encountered, and stakeholders related to the process of their implementation. In fact, the good practices are an alternative proposal against mass tourism and those policies that primarily promote coastal tourism.

The good practices will be presented during meetings and workshops that will take place in the context of the project from the external expert responsible for the creation of the Handbook.

EMBLEMATIC
MEDITERRANEAN
MOUNTAINS

In addition, a toolbox that will include useful information and facts for professionals (entrepreneurs and local authorities) and stakeholders from different sectors is presented within the Handbook.

Definition of Good Practices

“Good practices” can be defined in multiple ways. However, according to the European Commission a good practice is a thread common to most definitions implies strategies, approaches, and/ or activities that have been shown through research and evaluation to be effective, efficient, sustainable and/ or transferable, and to reliably lead to a desired result¹.

Good practices may be established and implemented by public and private authorities and bodies, organizations, enterprises, etc., while they serve as a general framework for a variety of situations.

In general, good practices could also be the results of research, studies, and experience the adoption and implementation of which has proved to lead safely and surely to a successful and desired result.

A good practice is a relevant policy or intervention implemented in a real life setting and which has been favorable assessed in terms of adequacy (ethics and evidence) and equity as well as effectiveness and efficiency related to process and outcomes. Other criteria are important for successful transferability of the practice such as a clear definition of the context, sustainability, intersectionality, and participation of stakeholders.

European Commission

How to select a good practice

In order a good practice to be selected it must meet the following criteria:

- ❑ Is effective and successful.
- ❑ Is environmentally, economically, and socially sustainable.
- ❑ Is technically feasible.
- ❑ Is easy to learn and implement.

¹ https://ec.europa.eu/migrant-integration/page/what-are-good-practices_en#:~:text='Good%20practices'%20can%20be%20defined,lead%20to%20a%20desired%20result.

EMBLEMATIC
MEDITERRANEAN
MOUNTAINS

LEADER

- ❑ Meets current needs.
- ❑ Has a clear context description.
- ❑ Has clear description of the objectives and purposes.
- ❑ Has a clear description of the actions/ activities involved within the practice.
- ❑ Engages stakeholders and target groups.
- ❑ Has sufficient indication of transferability / show potential for replication.

In the context of the creation of the Handbook, each partner suggested good practices implemented effectively from their regions and presented them briefly during a virtual meeting. Afterwards, all the good practices presented were collected and evaluated from the partners to co- decide which 25 practices will be included in the Handbook. For the evaluation of the good practices, the transferability, effectiveness, the difficulty of the implementation of each one of them were examined by the partnership.

CHAPTER 1

GOOD PRACTICES RELATED TO VISITORS & GENERAL PUBLIC

1. Sport events organizing to attract visitors all year round

1. General Information of the practice

Category	Practices related to alternative activities	
Target group to which the practice is addressed	Visitors/ final public	
Institution/ organization in charge of the practice	<ul style="list-style-type: none"> Lailias Mountain Running Club The Management Body of Lailias 	
Location of the organization/ institution of the practice	Country	Greece
	Region	Central Macedonia, Regional Unit of Serres
	Mountain	Lailias – Vrontou

2. Detailed description of the good practice

Short summary of the practice	Sport events are being organized during spring and summer to mitigate the negative effects of seasonality.
Detailed information on the practice	<p>The region where Lailias Mountain is located is characterized by rich natural beauty while it provides recreational and other activities for the visitors/ tourists.</p> <p>The main activity provided is skiing at the ski resort center located at the top of the mountain. During winter, it attracts many visitors from the city of Serres as well as from neighboring cities.</p> <p>The objectives of the practice focus in extending the tourism season and in increasing the number of the tourists visiting the place during seasons that the tourism demand is low. The organization of several sporting events during spring and summer assists the mitigation of the negative effects of seasonality.</p> <p>Collective bodies of the region cooperate for the organization of events such as: running competitions, orienteering games, and cycling races.</p> <p>For instance, the Lailias Mountain Running Club is organizing a 27km road race which passes through unexplored paths and a magnificent landscape.</p>
Potential for learning or transfer	Easy to be transferred
Resources needed	<p>Economic: 3.000-5.000 €/ The funding of the organization of the sporting events is resulting from local sponsors. A significant amount of the total budget is intended as prize for the winners and honorees participating at the events.</p> <p>Human: A lot of volunteers help the organization of the events.</p>
Actors/ stakeholders related to the process of the implementation of the practice	<ul style="list-style-type: none"> The Hellenic Athletics Federation (SEGAS) The Lailias Mountain Running club The Management Body of Lailias The Administration unit of the region of Central Macedonia

2. “Mark the path”

1. General Information of the practice

Category	Practices related to alternative activities	
Target group to which the practice is addressed	Final public	
Institution/ organization in charge of the practice	Pieria Forest Management Authority	
Location of the organization/ institution of the practice	Country	Greece
	Region	Central Macedonia, Regional Unit of Pieria
	Mountain	Olympus

2. Detailed description of the good practice

Short summary of the practice	The mountain trails are maintained in terms of security and access for the visitors. Also, there is signage to inform those who want to follow the trails.
Detailed information on the practice	The Organization responsible for the practice placed two opposing signs in the tree trunk and every 30 meters using special ecological glue. When visitors approach the mountain, they find a map with all the trails in several places. While the visitors are along the trail, they can find small coloured signs with numbers on them showing the way.
Potential for learning or transfer	There is potential for learning or transfer
Resources needed <ul style="list-style-type: none"> Economic Human 	Economic: 35€ / km for the labels and the rubber glue Human: 1 person who knows the trail and can use the glue is needed
Actors/ stakeholders related to the process of the implementation of the practice	<ul style="list-style-type: none"> Mountaineering clubs Shelters located in the mountain
How long did it take for the setup of the practice?	Less than a month for each trail
Why is the practice successful?	The hiking experience is safer for the users

EMBLEMATIC
MEDITERRANEAN

4. “Be a leader!”

1. General Information of the practice

Category	Practices related to alternative activities	
Target group to which the practice is addressed	Final public	
Institution/ organization in charge of the practice	Institute of Vocational Training	
Location of the organization/ institution of the practice	Country	Greece
	Region	Central Macedonia, Regional Unit of Pieria
	Mountain	Olympus

2. Detailed description of the good practice

Short summary of the practice	The Institute of Vocational Training educates and trains people to become “mountain leaders”. More and more young people choose to be engaged and get involved within the nature.
Detailed information on the practice	The “mountain leader” carries out duties that a climbing companion exercises mainly during mountain hiking. The scope of his professional activity includes: a mountain mass or specific mountainous area or an area of special natural interest, such as national parks, marked or unmarked trails, gorges, mountain masses, refuges, etc. In addition, the mountain leaders take into consideration protected areas, traversing routes especially in an alpine terrain, mountainous zone at national and regional level and provincial parks. The mountain leaders as experts offer premium services and transform the mountain into a friendly and safe experience for the visitors/ tourists.
Potential for learning or transfer	Not suitable for transferring
Resources needed <ul style="list-style-type: none"> Economic Human 	Economic: There is no cost for the students because it is a public Institute Human: Trainers and trainees
Actors/ stakeholders related to the process of the implementation of the practice	Young people
How long did it take for the setup of the practice?	It takes 2 years for the completion of the training

	Mountain	<ul style="list-style-type: none"> • Canigó, France • Çika, Albania • Pedraforca, Spain • Gran Sasso Italy • Olympus, Greece • Etna, Italy • Serre de Tramuntana, Spain • Mnt (Psiliritis) Idi, Greece • Saint – Victoire, France

2. Detailed description of the good practice

Short summary of the practice	A collection of 9 tourist guides with 9 different eco-journeys with a map of each area.
Detailed information on the practice	The “Emblematic Mediterranean Mountains network” carried out an ambitious project to offer a more intensive, authentic, and sustainable travel experience. To achieve these, they worked together and proposed 9 different “eco- journeys” (one for each mountain), which lead you to discover the real vibe for each mountain. The network printed 9 guides with the same template, so the visitors who have used one of these booklets, be familiarized with all the other booklets of the collection. Moreover, using the same template the creation cost was significant lower because the 9 partners shared it.

9. Educational program "Reduce - Recycle - Reuse"

1. General Information of the practice

Category	Practices related to circular economy	
Target group to which the practice is addressed	Students from the elementary schools of the region	
Institution/ organization in charge of the practice	PSILORITIS UNESCO GLOBAL GEOPARK in the context of the Project "Ruritage" (H2020), with the collaboration of the Natural History Museum of Crete and the Anogia Environmental Center	
Location of the organization/ institution of the practice	Country	Greece
	Region	Crete
	Mountain	Ida (Psiloritis)

2. Detailed description of the good practice

Short summary of the practice	The educational program "Reduce- Recycle - Reuse" aims to raise awareness on issues regarding overconsumption and plastic- waste among students.
Detailed information on the practice	The purpose of the program is to get the students informed and active concerning the reduction, recycling, and reuse of materials, especially plastic. Specifically, its goals are to raise awareness about how plastic causes problems to the environment and people and to learn about the habits that can be adopted to reduce its use. In addition, the program aims to strengthen the knowledge about the process of recycling and the separation of recyclable materials, so that the students can apply it themselves. Finally, to discover the benefits of reducing, recycling, and reusing so that they become aware and adopt this environmental behaviour in their everyday lives as well as try and inform other people in their environment (parents, siblings, friends). The program itself consists of a theoretical section and another one which includes lots of fun and educational activities. It is structured in a way that can be performed either directly by the Geopark' s staff or it can be disseminated with detailed informative material and the necessary equipment and can be implemented by the teachers themselves.
Potential for learning or transfer	The educational program itself is literally transferable and this exact characteristic also marks its potential for transfer as a practice, in the sense that it can be applied by different educators in different areas without the geopark's staff presence.
Resources needed	<p>Economic: 4.000€ for the development of the program and the necessary equipment (educational activity kit) and the salary of the employee</p> <p>Human: One employee that worked for the project</p>

EMBLEMATIC
MEDITERRANEAN
MOUNTAINS

Actors/ stakeholders related to the process of the implementation of the practice	<ul style="list-style-type: none"> • Geopark educational staff • Educators from elementary schools
How long did it take for the setup of the practice?	3 months
Why is the practice successful?	The practice is successful because it is easily transferable across schools and requires no special knowledge, apart from the theoretical background that is provided for the teacher within the kit of the educational program
Innovations incorporated	The practice is innovative because it manages to increase the reach of the educational program by utilising the educators in every school and without demanding the Geopark's educational staff to travel across the area and to perform the educational activities needed
List of EmbleMatiC Common Attributes	2, 3, 7, 12, 20, 21, 23, 25, 26, 29 (pages 66 & 67)
Challenges encountered	There is a possibility that the educators and/ or schools are not willing to support the initiative

10 & 11 Digital- tour applications for Psiloritis Geopark (2 practices)

1. General Information of the practice

Category	Practices related to alternative activities	
Target group to which the practice is addressed	Tourists, students	
Institution/ organization in charge of the practice	AKOMM-PSILORITIS DEVELOPMENT AGENCY SA, PSILORITIS UNESCO GLOBAL GEOPARK	
Location of the organization/ institution of the practice	Country	Greece
	Region	Crete
	Mountain	Ida (Psiloritis)

2. Detailed description of the good practice

Short summary of the practice	A mobile and a virtual application were created for the visitors, through which they can be informed in real- time while exploring the geo- routes of the Geopark
Detailed information on the practice	<p>In the framework of INTERREG GREECE-CYPRUS program, the E-geodiscover application mainly aimed at students and/ or younger people was created. By downloading and running the application while following a geo- route at the Geopark, the user gets real- time informative data for the most distinctive sites of the route while getting also corresponding pop- up questions in the form of a quiz- game that is concluded by the end of the geo- route.</p> <p>Moreover, through the HORIZON – RURITAGE program, a virtual reality application was developed for the plateau of Nida, one of the most emblematic points of Psiloritis Geopark. This application (offered through the Geopark's website) allows the visitor to enjoy a virtual tour of the plateau via pop- up windows with information and panoramas regarding the geological and/ or cultural monuments of the area.</p>
Potential for learning or transfer	The practice could be applied in other mountainous regions and promote areas that are not easily accessible. It could also be developed with the use of common electronic devices (i.e., drones, ground cameras, tablets) and enriched after the development of an initial platform that could involve virtual reality, augmented reality, or simpler digital tools such as digital maps or multi- level informative maps.
Resources needed	<p>Economic: 20.000€ for the equipment (cameras, drones, digital domain to maintain the data and the platform)</p> <p>Human: staff for the collection of the data and the development of the digital applications and/ or platforms</p>

EMBLEMATIC
MEDITERRANEAN
MOUNTAINS

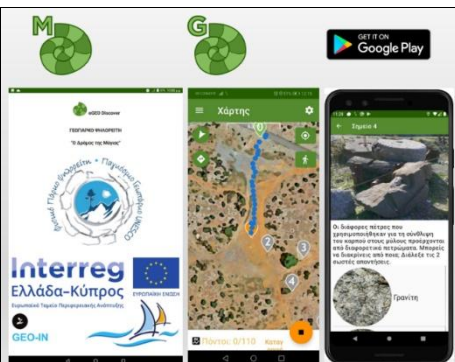

Actors/ stakeholders related to the process of the implementation of the practice	<ul style="list-style-type: none"> • Experts for the collection of the informative material • Digital experts for the development of the digital applications and/ or platforms
How long did it take for the setup of the practice?	18 months
Why is the practice successful?	The practice provides the opportunity to visit the Geopark remotely and without discrimination (inclusivity for people with mobility difficulties). It also gives the visitor the opportunity to explore the area with all the necessary expert's information provided digitally and in real- time and without the need of the presence of an expert. It is worth noting that the E- Geodiscover digital application used when taking the route and the corresponding pop- up quiz in the field does not require any sort of internet connection, other than for downloading the app. If the app is installed, the only requirement to use it is for the device to have a functioning GPS system.
Innovations incorporated	These digital tools use modern and friendly to the user technologies with the possibility of easy enrichment and upgrading, while providing an enhanced learning experience to the visitor.
List of EmbleMatiC Common Attributes	3, 4, 8, 9, 10, 11, 12, 17, 26, 28 (pages 66 & 67)
Challenges encountered	There are increased technical requirements for the development of the digital tools.

21. Digital repository for Psiloritis Geopark

1. General Information of the practice

Category	Practices related to alternative activities	
Target group to which the practice is addressed	Local people, local associates (museums, facility management bodies)	
Institution/ organization in charge of the practice	AKOMM-PSILORITIS DEVELOPMENT AGENCY SA, PSILORITIS UNESCO GLOBAL GEOPARK	
Location of the organization/ institution of the practice	Country	Greece
	Region	Crete
	Mountain	Ida (Psiloritis)

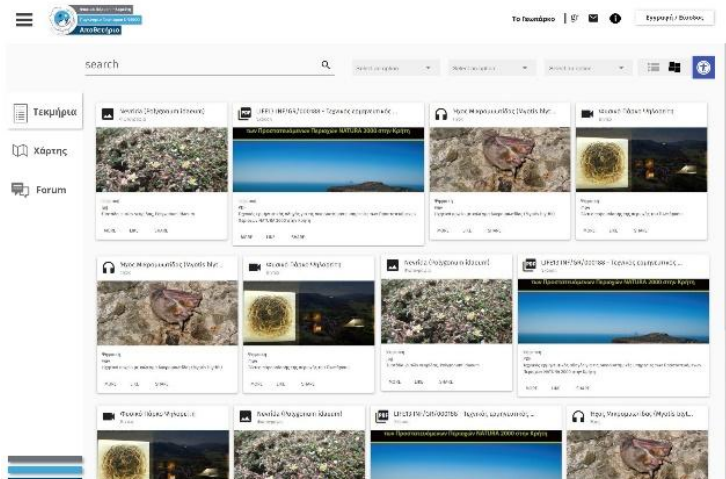

2. Detailed description of the good practice

Short summary of the practice	Design and creation of a digital repository to collect and preserve information regarding the geodiversity, biodiversity, history, and culture of Psiloritis mountain.
Detailed information on the practice	The purpose of the practice is to design and develop a digital repository for the collection, documentation and preservation of information and evidence concerning elements of the geodiversity, biodiversity, history, and culture of the area of Psiloritis Geopark. This digital repository will serve as an “online library” for all the information forming the Psiloritis mountain identity and will be accessible to anyone interested in contributing and/ or learning this information, as long they conform to basic quality criteria as users (spam, verification of information etc.).
Potential for learning or transfer	The digital repository, once developed, holds significant potential in its own enrichment with time while it also holds the potential in growing in subjects or areas that it could cover, as well. As a practice it is easily transferrable in other areas since it practically is an open- access database.
Resources needed <ul style="list-style-type: none"> Economic Human 	Economic: 40.000€ for the development and the maintenance of the database and the corresponding technician’s salary. Human: a technician to design and create the digital repository
Actors/ stakeholders related to the process of the implementation of the practice	<ul style="list-style-type: none"> Organizations that manage infrastructure important to the region Organizations or individuals that have an indirect relationship and support with various ways the activities of the Psiloritis Geopark
How long did it take for the setup of the practice?	18 months

EMBLEMATIC
MEDITERRANEAN
MOUNTAINS

Why is the practice successful?	The practice is successful because it provides local interested parties the opportunity to contribute to an effort with wide impact in its outreach and communication potential. As an open database, the platform is mostly self-sustained, concerning its content.
Innovations incorporated	The practice is considered as innovative because it combines digital technologies with an initiative like citizen science, to create a “memory box” of information referring to an area.
List of EmbleMatiC Common Attributes	3, 8, 10, 21, 25, 26, 27, 28, 29 (pages 66 & 67)
Challenges encountered	There is a possibility that the local stakeholders may not support the initiative.

22. Cultural integration Guide

1. General Information of the practice

Category	Practices related to the promotion of local products and /or services	
Target group to which the practice is addressed	Enterprises located within the region	
Institution/ organization in charge of the practice	Serres Development Agency – S.A Chamber of Commerce and Industry of Serres	
Location of the organization/ institution of the practice	Country	Greece
	Region	Central Macedonia – Regional Unit of Serres
	Mountain	Lailias – Vrontou

2. Detailed description of the good practice

Short summary of the practice	A study that guides local enterprises to integrate local natural and cultural elements into their products and contributes to strengthening their position in the market
Detailed information on the practice	The study was prepared and published by Serres Development Agency in collaboration with the Region of Central Macedonia (regional unit of Serres) and in the context of the LEADER/CLLD Program of the previous programming period. The study was designed in a way through which all the necessary local cultural elements and values are included and could be utilized by the enterprises to enrich their products with local identity, and special characteristics. The study includes ideas and ways of exploiting the comparative advantages of the region aligned with the natural and cultural wealth. For instance, the local enterprises could adopt ideas from myths, customs, monuments of the region and use them to name their products or link them with the way they are being produced. This guide is used by ANESER SA. and the Chamber of Commerce and Industry of Serres and is a popular tool for businesses and business networks located in the area. Through the directions of the guide businesses can obtain recognition.
Potential for learning or transfer	Not so easy to be transferred. There are several necessary prerequisites
Resources needed <ul style="list-style-type: none"> Economic Human 	Economic: 10.000€ for the preparation and publish of the study Human: experts for the creation of the guide
Actors/ stakeholders related to the process of the implementation of the practice	<ul style="list-style-type: none"> Region of Central Macedonia Serres Development Agency – S.A Chamber of Commerce and Industry of Serres

MOUNTAINS

How long did it take for the setup of the practice?	12 months
Why is the practice successful?	The study became popular through the LEADER / CLLD program. It supported old and new enterprises located in the region to integrate local elements related to culture into their products and services. The products/ services were differentiated, and their uniqueness was highlighted.
Innovations incorporated	No specific innovation
List of EmbleMatiC Common Attributes	10 (page 66)
Challenges encountered	A lot of enterprises that operated under their owner's brand name expressed concerns regarding the incorporation of specific features proposed in the context of the guide into the brand names of their products in terms of marketing and promotion.

23. Promotion of locally produced products and services

1. General Information of the practice

Category	Practices related to networking activities	
Target group to which the practice is addressed	Enterprises located in the wider area of lake Kerkini	
Institution/ organization in charge of the practice	Non-profit - Association of small enterprises in Lake Kerkini	
Location of the organization/ institution of the practice	Country	Greece
	Region	Central Macedonia, Regional Unit of Serres
	Mountain	Kerkini Belles

2. Detailed description of the good practice

Short summary of the practice	Enhancement of circular economy and local production system in the area
Detailed information on the practice	<p>“Kerkini like – lake experience” is the initiative of the “Kerkini – Frontier of Nature” professional’s association whose members are small businesses activating in the wider area of the national park of the lake – including the mountainous areas of Belles and Krouisia- and was established in 2020. Basically, it is a network of businesses which have from the beginning agreed to use mainly locally produced products and raw materials as well as local recipes. In addition, the members of the network give informative brochures and provide the visitors with information about the products that are produced locally from all the members of the network. Through this way the visitors of the area are getting informed about the place, the local products, and the way they are produced, their history, and where to buy them.</p>
Potential for learning or transfer	Easy to be transferred
Resources needed <ul style="list-style-type: none"> • Economic • Human 	Human: the active participation of the members
Actors/ stakeholders related to the process of the implementation of the practice	<ul style="list-style-type: none"> • The enterprises of Lake Kerkini • “Kerkini – The Frontier of Nature professional’s association”
How long did it take for the setup of the practice?	1-2 months

24. “Psiloritis Geopark” local quality label

1. General Information of the practice

Category	Practices related to the promotion of local products and /or services	
Target group to which the practice is addressed	Local enterprises (accommodation services, taverns, museums, small industry of local products)	
Institution/ organization in charge of the practice	AKOMM-PSILORITIS DEVELOPMENT AGENCY SA, PSILORITIS UNESCO GLOBAL GEOPARK	
Location of the organization/ institution of the practice	Country	Greece
	Region	Crete
	Mountain	Ida (Psiloritis)

2. Detailed description of the good practice

Short summary of the practice	The PSILORITIS GEOPARK Local Quality Label is awarded to businesses activating in the area (accommodations, restaurants, producers) that meet specific criteria.
Detailed information on the practice	The PSILORITIS GEOPARK Local Quality Label is awarded to businesses located and activating in the area (accommodations, restaurants, producers) but also associates (museums, facility management bodies), reflected differently depending on the characteristics of each agency. The Local Quality Label promotes networking between all the involved bodies of the Geopark area that include its environmental and cultural value, while it also benefits from the Geopark’s recognition by UNESCO and additional networking and promotional opportunities it provides. The enterprises/ agencies that are awarded with the Local Quality Label must meet specific standards, concerning their operation (ethical practices, sustainability, etc.) but also the way through which they reflect the local identity (quality and origin of raw materials, aesthetics etc.). So far, the Psiloritis Geopark Local Quality Label has been awarded to numerous hotels, restaurants, local producers, artists, alternative tourism agencies, as well as museums and management bodies.
Potential for learning or transfer	The practice holds obvious benefits for the local enterprises and the Geopark itself. In terms of transferability and applicability, it requires nothing more than the initiative to be taken as a practice for any specific area, the time of communication with potential participants and resources spent on equipment and staff.
Resources needed	<p>Economic: 10.000€ for equipment (Local Quality Label stickers and signs) and salaries for the staff working on the verification of the enterprises’ standards</p> <p>Human: Staff to work on the verification of the enterprises</p>

Actors/ stakeholders related to the process of the implementation of the practice	<ul style="list-style-type: none"> • Local government (first and second level) • businesses and their collective bodies • Organizations that manage infrastructure important to the region and organizations that have an indirect relationship and support with various ways the activities of the Psiloritis Geopark
How long did it take for the setup of the practice?	18 months
Why is the practice successful?	<p>The practice is successful because it is easy and fast in its implementation and it holds networking and promotional opportunities for the local stakeholders without any requirements (i.e., financial) on their behalf.</p> <p>The procedure for granting the Local Quality Label is very simple and it includes the few following steps:</p> <ul style="list-style-type: none"> • Submission of an application of interest to get the Label by the enterprise • Approval of the application • Signing of an Agreement between the enterprise and the management body <p>The enterprises/ agencies that are awarded the Local quality Label must meet some criteria concerning their mode of operation (infrastructures consistent with the existing institutional framework, quality assurance certificates according to international or national standards) but also the way in which they reflect the local identity (raw material origin from within the area of Psiloritis or alternatively from Crete or Greece, local product or folk art based on practices or motifs of local tradition).</p>
Innovations incorporated	The practice is innovative because it manages to promote local identity, cooperation, and networking within an already established community of stakeholders with common background, characteristics, and business goals.
List of EmbleMatiC Common Attributes	2, 3, 4, 7, 10, 11, 12, 13, 14, 18, 19, 23, 25, 27, 29, 30 (pages 66 & 67)
Challenges encountered	There is possibility that the local stakeholders may not support the initiative.

25. “Friends of Psiloritis Mountain” discount card

1. General Information of the practice

Category	Practices related to networking activities	
Target group to which the practice is addressed	Tourists that visit the area frequently	
Institution/ organization/ in charge of the practice	AKOMM-PSILORITIS DEVELOPMENT AGENCY SA	
Location of the organization/ institution of the practice	Country	Greece
	Region	Crete
	Mountain	Ida (Psiloritis)

2. Detailed description of the good practice

Short summary of the practice	Guest reward program, mainly for frequent visitors. Visitors collect points through each purchase & can use them anytime & in any of the businesses participating in the program.
Detailed information on the practice	<p>This is a reward program for the visitors of Psiloritis mountain in which local businesses (mainly taverns and accommodation infrastructures) participate. Each business operates as part of a network but as an individual business as well.</p> <p>The program is initially focused on visitors from Crete and basically from the nearby urban regions of Heraklion and Rethymnon given that it is possible for them visiting Psiloritis on a regular basis.</p> <p>Each visitor collects points for the purchase of products and/ or services and can redeem them anytime and in any of the participating businesses.</p> <p>The discount card is available in print and electronic form – via a mobile app – and is updated with every new purchase.</p>
Potential for learning or transfer	The practice is simple for implementation and could be easily transferred and applied everywhere to benefit local enterprises. The range of the practice could be extended in different areas and businesses as well such as restaurants and hotels, souvenir shops, traditional art shops, etc.).
Resources needed <ul style="list-style-type: none"> Economic Human 	<p>Economic: 8.000€ for printing the cards and/ or keeping the online app active</p> <p>Human: the designer of the application</p>
Actors/ stakeholders related to the process of the implementation of the practice	Businesses and their collective bodies
How long did it take for the setup of the practice?	12 months

EMBLEMATIC
MEDITERRANEAN
MOUNTAINS

Why is the practice successful?	The practice is successful because it is easy and fast in its implementation, almost completely automated in its digital form and it provides the opportunity for the local stakeholders to create a more permanent connection with the tourist market.
Innovations incorporated	The practice is considered as innovative because it motivates part of the tourist market (local or nearby tourists) to return to a specific area by providing financial benefits with every recurring purchase. It also utilises mobile application technology.
List of EmbleMatiC Common Attributes	2, 3, 4, 7, 10, 12, 14, 18, 19, 23, 29, 30 (pages 66 & 67)
Challenges encountered	There is a possibility that the local stakeholders may not support the initiative.
